

Pre-Conference Workshop

Prior to the EuroResidue IX conference, a workshop will be organized for colleagues new in the field of veterinary drug residue analysis. The aim of this workshop is to familiarize yourself with specific legislative and technical aspects of the field, to discuss the main topics of the conference, and to get to know colleagues and expand your network. The workshop will be highly informative, interactive and guaranteed to be a lot of fun as well. When participating in this workshop, the conference will be far more beneficial and informative.

Programme

Sunday 17 May:	Get-together party
Monday 18 May:	Congress and excursion
Tuesday 19 May:	Congress and dinner
Wednesday 20 May:	Congress closing

Venue

Hotel Zuiderduin, Egmond aan Zee, the Netherlands.
This hotel is located 30 km from Amsterdam Airport.
Transport between airport and hotel will be arranged.

Call for Young Scientist Award nominees

At the EuroResidue Conference, the organisers intend to confer a scientific to a young scientist with high potential. It is, however, a challenge to assess all the talent out there in the field. It is for this reason that we are asking for your assistance and invite the residue scientist community to **make us aware of candidates for the Young Scientist Award**. Criteria for aspirant award holders could be originality and quality of the delivered work, but factors such as powerful representation of the profession and making the work understandable to the public can also be considered as a reason for listing a candidate. Preferably results of the nominee's work are accessible, for example publications in high-standard peer-reviewed scientific journals. Though there are no specific age-limits, the nominee should be considered "young" by generally accepted qualitative terms.

Please make your nominee, with a brief, adequate justification known to the Chair of the Scientific Committee before March 1st, 2020

Presentations

Abstracts are invited for consideration for oral, short flash poster presentation or poster only presentation on the different topics.

The central theme of the conference will be on modern approaches in the control of veterinary drug residues, advances in analytical methods and the application of such strategies in inspection and control. Within this context, the Scientific Committee would also welcome contributions on: aspects of residue depletion (including metabolites); 'omic' approaches; robotics; hyphenated techniques; innovation in screening and confirmatory analysis; legislative aspects; monitoring based on risk analysis and epidemiological information; antimicrobial resistance, control in third countries, analytical criteria and the environment as a source of residues in food producing animals.

Oral and poster contributions are considered to be of equal status. The Scientific Committee will decide on acceptance and on the manner of presentation.

Abstracts, not exceeding 200 words, should be submitted via the EuroResidue website, using the format supplied. Authors of accepted abstracts will be invited to submit full manuscripts for publication in a peer reviewed scientific journal dedicated to this symposium.

Key dates

Abstract submission	1 October 2019
Notification of acceptance	15 February 2020
Deadline Early Registration fee	1 March 2020

Exhibition

Laboratory supplies, instruments, equipment, test kits and other items related to the subject of the meeting will be exhibited by various companies.

Conference language

English only

18-20 May, 2020

First circular
and call for papers

Dear Colleague,

On behalf of the EuroResidue Conference Foundation, and the Scientific- and Organising Committees, it is our pleasure to invite you to EuroResidue IX, which will be held 18 to 20 May 2020 in Egmond aan Zee, The Netherlands.

The EuroResidue Conferences are intended to include all aspects of the control of residues of veterinary drugs. Special emphasis is placed upon recent developments related to the detection and determination of residues in food, feed and other relevant matrices, pharmaceutical and toxicological studies, and veterinary drug registration and regulation. Previous EuroResidue Conferences were held in 1990, 1993, 1996, 2000, 2004, 2008, 2012 and 2016. The last "Ghent" meeting (the 8th International Symposium on Hormone and Veterinary Drug Residue Analysis, which is complementary to the EuroResidue series) took place in 2018.

Once again, the intention is to bring together experts and interested persons from various scientific disciplines to enable them to discuss recent developments and problems in the field of residue analysis and control, and to debate and exchange ideas and opinions.

The program includes keynote lectures, oral, poster and flash presentations, workshops and a display of commercial products.

The conference venue has meeting facilities, participant accommodation, restaurants and bars all under a single roof and offers excellent opportunities for informal contacts and networking. Conference participants can breathe fresh sea air at the Dutch seaside only 100 meters from the venue, allowing the opportunity to clear the head after long, inspiring days.

We hope to see you all in May 2020 at EuroResidue IX.

Yours sincerely,

Aldert Bergwerff	Saskia Sterk	Bruno Le Bizec

Preliminary scientific outline

In addition to the general topics related to the scope of the conference, EuroResidue IX will feature a number of specific topics. Contributions for oral or poster presentation are called for on:

- Advances in screening technology
- Advances in sample preparation
- Confirmation technologies
- Omics
- The environment and residues
- Quality Assurance, Risk Management and Risk analysis
- Analytical criteria and validation

Organising Committee

P. Zoontjes, P. Boshuis, J. Lasaroms, S.S. Sterk (chair)

Scientific Committee

A. Cannavan	UK
V. Chabotteaux	Belgium
A. Chicoine	Canada
S. Croubels	Belgium
E. Daeseleire	Belgium
S. Darkoui	Morocco
G. Dervilly	France
V. Fattori	Italy
G. Hamscher	Germany
M. van Iersel	Netherlands
T. Kuuranne	Austria
B. Le Bizec	France (Chair)
A. de Queiroz Mauricio	Brazil
S. Morris	New Zealand
J. Polzer	Germany
J. Scarth	UK
S. Stead	UK
S. Sterk	Netherlands
L. Vanhaecke	Belgium
E. Verdon	France

Proceedings

Authors will be invited to publish their work as a full paper, which, in case of acceptance, will be published in a peer-reviewed proceedings scientific journal following the meeting.

Registration Fees

Early registration € 615 (Until 2020.03.01)
Late registration € 665 (After 2020.03.01)
1 day registration € 200

The full registration fee includes get-together party, refreshments, three lunches, an evening meal, an excursion and a congress dinner.

Accommodation

The hotel, breakfast included, based on a single room with private bathroom and WLAN can be booked via the Euroresidue website. More information on extra nights and double rooms can also be found on the registration EuroResidue website under 'registration'.

Registration

Conference registration and hotel reservations can be made on the EuroResidue website.

Cancellation policy

Cancellation must be in writing and sent to the Registration Office. Cancellation before March 1st 2020, will give you reimbursement of the registration fee minus € 50 handling charges. After this date there will be no fee refunded.

Further Announcements

A second circular will be published in February 2020. It will contain the complete meeting program, including the planned social events.
